Total average outpatient spending per visit (RMB)	275	437	-37.1%

Notes:

- The above total average inpatient spending per bed-day is determined based on the Company's bills for services provided to patients, without taking into account differences with medical insurance settlements and the Company's incurred deduction for some medical expenses that are not reimbursed.
- The considered increases in outpatient visits and significant reduction in expenses compared to the same period last year are primarily due to: i) sale of lower-priced online health services through the Company's internet hospitals; and ii) optimizing the structure of medical services provided to remote areas and hospitals.

The above operating performance indicators are based on the Company's records and are not necessarily audited by the Company's auditors. The operating performance indicators are different from those disclosed in the annual and semi-annual reports. The operating performance indicators disclosed in the annual and semi-annual reports shall prevail if there is a discrepancy.

Shareholders and potential investors of the Company are reminded to rationally deal with any information not officially released by the Company, and shareholders and potential investors of the Company should exercise caution when dealing in the shares of the Company.
